

ADA2 - Shorting Cables with Alligator Clips

The ADA2 shorting cables clip to electrical terminals for setting up temporary circuits. Each red and black cable is wrapped in vinyl insulation and reaches 3.5 feet in length. The small alligator clips are strong, yet long and thin enough to get into the tight areas commonly found in HVAC/R equipment.

SPECIFICATIONS

Length: 3.5 feet

Max temperature: 176°F (80°C)

Insulation material: Vinyl

Probe tip type: Alligator clip

Plug type: No plug, alligator tips
