

## Kwik Kuts (Model # KK-xxxx)

These are 15" x 24" pads of filter media that can be easily cut to fit any window or wall mounted room air conditioner. They are offered in the same spun glass, foam and aluminum media described above. Also offered are 1/2" Permaire and plastic-backed foam.

## Hammock Rolls and Pads

Hammock rolls are available in nominal 1" spun glass, 2" spun glass, and 1" polyester synthetic fiber media. Performance data on all Flanders hammock media is available upon request.

Typically, these are for Lennox type furnaces. (Lennox is a brand name. It is used here for system identification only.)

Hammock rolls are 20 foot rolls of media cut in various widths. In most cases, a single cut across the roll will produce a ready-to-use filter pad. Packaged in a handy carton that can be used as a dispenser. Hammock rolls are UL Class 2 fire rated. The 1" spun glass is also available in pre-cut hammock pads, individually packaged in plastic.

## Service Rolls

Service Rolls air filtration media are manufactured in selected widths, prepared in roll lengths that make manageable roll sizes. In most cases, a single cut across the roll will produce a ready-to-install filter pad. All are typically used in room unit air conditioners.

The following media are offered as service rolls:

Spun Glass: (Models SGxxxxKK) This is a rigid, nominal 3/8" thick, untreated dry spun glass. Designed for use without a frame.

Foam: (Models FRxxxx) A rugged polyurethane foam. Washable and will withstand repeated cleaning with mild soap and water. Foam service rolls are available in 1/4", 1/2", 1" and 2" media thicknesses.

Aluminum: (Models EAx) The aluminum service roll is an expanded aluminum mesh. It is a nominal 1/4" thick dry filter media that requires the addition of a dust adhesive for effective filtration.
